PEOPLE FIRST

Setting the foundation for sustained growth

FACT SHEET

Workplace Experience

Improve mentoring programs for Technical workgroups

Navy is committed to growing the skillset within Engineering and Technical Workgroups through technical and managerial Mentoring and Recognition programs

Benefits

All members of the engineering and technical workforce are able to enhance their technical and managerial skillset through mentoring, coaching, and leadership programs.

Developing Navy Leadership

The Directorate of Navy Culture (DNC) is focused on developing strong leaders within the Navy Engineering Community. DNC provides leadership and professional development opportunities through; Leader Development, Leadership Coaching, Team Development, and Mentoring Support programs.

Build on You

Developed by the University of Melbourne specifically for Defence personnel, Build on you, provides online learning to build on the 8 Future Focused Capabilities and to develop professional and technical skills.

Recognition

Additional managerial and technical recognition is available to eligible members through membership to industry recognised Professional Organisations such as Engineers Australia and the Institute of Marine Engineering, Science & Technology.
