PHYSICAL TRAINING

1. Physical training is an integral part of life in the RAN. **In the first week of training you will undertake the RAN Swim test and RAN Physical Fitness Test (RAN PFT).** Both tests are designed to be sub-maximal, that is, they should be passed with minimal effort.

RAN Swim Test

2. All initial entry and lateral entry personnel will undertake the RANST. Personnel under initial training are to achieve this competency before the commencement of any other water based Defence activity.

3. The swim test is to be carried out in a pool or in a suitable area of the sea. Trainees are to be dressed in working attire or overalls. The swim test includes the following:

- a. Perform a safe water entry from 3 metres height
- b. Perform an underwater swim of 10 metres
- c. Perform continuous survival swim for 50 metres
- d. Tread water to remain afloat for 15 minutes.

Recommended Physical Standards

4. To ensure that you will not be left behind in any physical aspect, it is **highly recommended** that you reach a sufficient level of fitness prior to your first day at the RANC. You should be able to competently perform the following fitness standards.

5. The components of the physical fitness test are:

a. **Flexed arm hang or push ups.** This tests a member's upper body strength and endurance, which reflects their ability to carry loads and support their own body weight. Both male and female members are expected to complete either the flexed arm hang or push ups with hands and toes only in contact with the ground.

b. **Sit Ups.** This tests a member's abdominal muscle strength and endurance which reflects their ability to lift and carry loads, flexibility and general muscle fitness. Adequate abdominal fitness reduces the risk of back injury.

c. **Aerobic/cardio vascular.** This test consists of a 2.4 km run/walk, or 5 km walk, or 500 metre swim or 20 metre shuttle run and reflects a member's ability to sustain physical activity. Treadmills or other machines are not to be used to assess this component of the test. Aerobically fit members acclimatise to hot weather environments more rapidly and are less likely to mentally or physically fatigue in combat duties. Where a member has an injury that prevents them undertaking the run/walk or walk component, they are to undertake the 500

OFFICIAL

metre swim, providing a Medical Officer confirms there is no restriction on the member attempting this component.

6. Due to requirements of the course, a minimum medical standard of **MEC201/J21** is required for course participants OR a medical certificate (PM 101) which indicates FIT to undertake RANPFT / RANST. Course participants are to be compliant in physical fitness and medical components of Individual Readiness for the duration of the course.

7. To assist your physical preparation a five phase physical training program is provided through the **ADF Active mobile app**. This can be downloaded free from either the Apple Store or Google Play. The app provides a tailored program based on your testing results and provides the timings and cadence for all assessments. It is recommended that you start the program no later than 12 weeks prior to joining the RANC.

A course program outlining specific lectures and timings will be provided to trainees on the first day of the course.

4. In order to successfully complete all assessment criteria and be deemed competent, all trainees are required to successfully complete a written theory exam and all practical components of the course in varying conditions. Any failures throughout the S@S course will be dealt with under the Trainee Progress Management Plan (TPMP).
