

FACT SHEET

Demand Management

Technical Workforce Separation Rates

The ongoing process to understand and mitigate the drivers underpinning the high separation rates in the Technical Workforce.

Benefits

- Community feedback will allow the refining of activities.
- Reduction in separation rates to RAN target value will allow growth, reduce hollowness, and enable parity of workforce supply and demand.
- Reduction of hollowness will decrease workforce stress, which should increase satisfaction and retention.
- Increased outplacement, secondment and assist task completions will increase workforce skills, knowledge, aptitude and proficiency.
