Setting the foundation for sustained growth

FACT SHEET

Wellbeing & Lifestyle

Improve ship/shore connectivity

Leveraging commercial SATCOM offerings, Navy will improve, by almost an order of magnitude, the internet access available at sea to support Quality of Life and social communications.

Benefits

- Improve deployed connectivity with family
- Improve access to social, media and business sites
- Improve access to Defence and civil online training resources

Next Steps

- Approve funding
- Engage contractor support
- Engage SATCOM providers and CIOG
- Engage platform SPO for integration
- Install terminals and activate service
- Final Action to close it out

More Information

Over the last two years Navy has deployed dedicated SATCOM systems to support QoL at sea in MFU. These systems are very expensive and provide only limited capacity, but have been a marked improvement on what was available prior.

Status: In-Progress

Lead: Head Navy Capability

TARGETING

All personnel at sea

WHEN

2023-2026

YOU GET

Better internet access at sea
